PRODUCT DATA SHEET

DESCRIPTION & FEATURES

COLPHENE Flam 180 is an SBS-modified bitumen base ply for use in approved multiply waterproofing assemblies. COLPHENE Flam 180 is composed of a proprietary formulation of elastomeric styrene-butadiene-styrene (SBS) polymer modified bitumen and is reinforced with a tough, dimensionally stable non-woven polyester mat. The topside and underside are surfaced with polyolefin burn-off film to optimize heat welding.

STORAGE & HANDLING

Store rolls on end and maintain in an upright position to prevent damage. Store rolls in a clean dry location and cover as necessary to protect rolls from environmental damage such as extreme cold, heat, or moisture. Monitor varying environmental conditions during storage, handling and application of COLPHENE Flam 180.

APPLICATION

Prior to installation, unroll COLPHENE Flam 180 onto the surface and allow to relax. Position COLPHENE Flam 180 in desired position and back roll the product. COLPHENE Flam 180 is then heat welded to approved substrates. Refer to SOPREMA's specifications and installation instructions for additional application guidelines.
